Collaborative Teacher Education in Nepal

Miriam E. Corneli, English
Language Fellow, Nepal

Email: languagecoach.miriam@gmail.com

Nepal is famous for?

- Mt. Everest
- Rhinos
- Buddha
- ?

“Gurukul” education system

Typical Nepalese Classroom

“Teacher as Guru” Model

Lecture Method Prevails

Legislators

Lacanian psychoanalysis

Lackian Severe
Utopia

⇒ Lacanian psychoanalysis - rereading of Freudian psychoanalysis

⇒ Identity: It is constructed badly (Language - the supplement/replacement of lack - the absence of the desire for the integration with the mother.)

Language (= Mother)

⇒ Development of Subjectivity: It is based on loss, absence or failure.

⇒ Socialization of the subject: Transition from the imaginary to symbolic through mirror stage.

Imaginary - symbiotic relation of the child with the world.

- experiences full of masses of drives, no awareness of physical boundaries

- the first difference the child learns - absence or presence of satisfaction

Disturb

- Disruption of symbiosis - due to the presence of the father, i.e. (patriarchal law)

- loss or disruption of imaginary - due to the drive to return to oneness (with mother)

Often very large class sizes! 50 - 100 +

Co-teaching can help

Co-teaching

English Access Microscholarship Program, Nepal

Professional and Personal Connection!

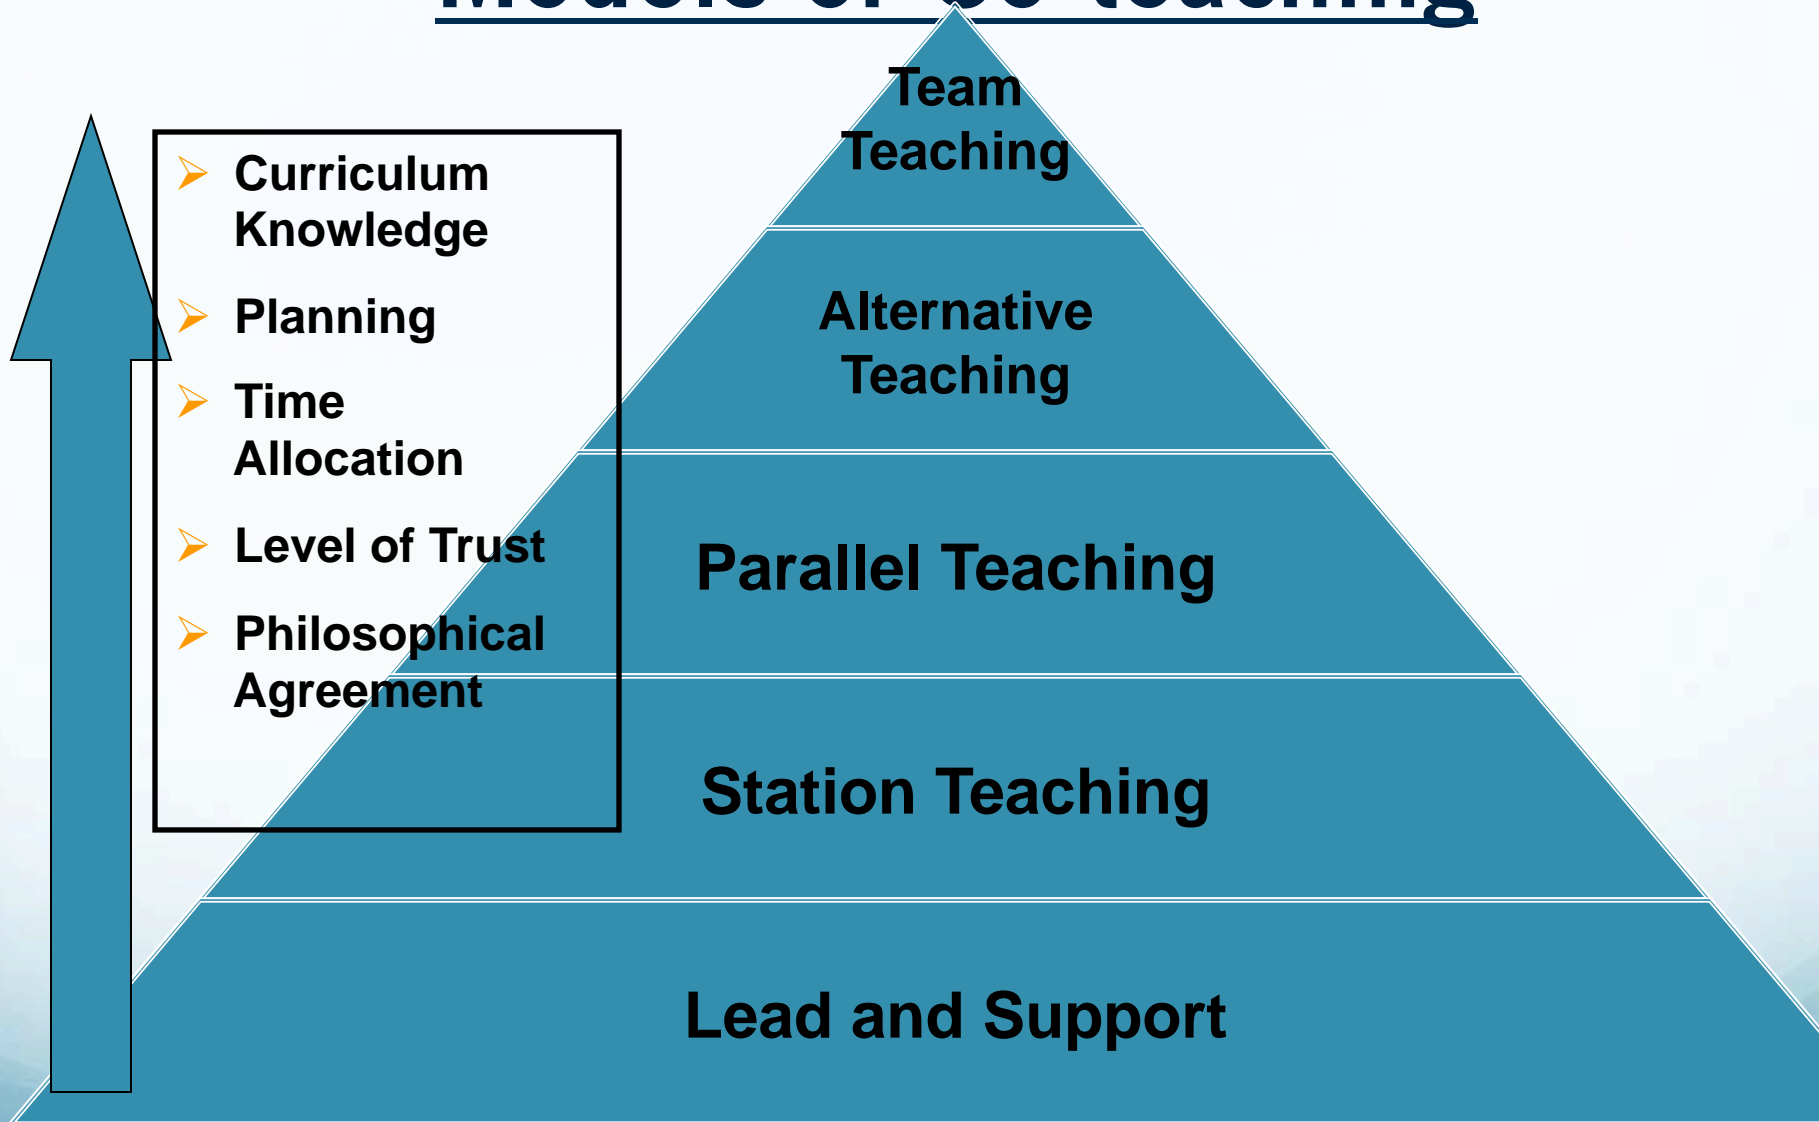

The Expansion of Co-Teaching

- Who = M.R. Campus, M.Ed. Student Teachers
- What = First-ever Co-Teaching Program
- When = Last fall, 2014
- Where = Mahendra Ratna Campus-Kathmandu
- Why = Because a shift in teacher training is urgently needed to increase skills, praxis, collaboration, creativity, + student retention & results.

Introducing Co-Teaching

Models of Co-teaching

“Reflection” Folder

“Benches” become Groups

Sample Co-Planning Template

Co-Teaching Lesson Plan Template #1

Teacher A: _____ Teacher B: _____
 Date: _____ Location: _____ Class: _____
 Lesson Objective: _____
 Essential Questions: _____
 Key Vocabulary: _____
 Important Activities: _____
 Pre-assessment: _____
 Formative assessment: _____
 Final Product/Homework?: _____
 Materials Needed: _____

Lesson Theme/ Topic	Co-Teaching Approach?	Time Needed?	Teacher A's Activities	Teacher B's Activities	Considerations (adaptations, differentiation, student needs)
Beginning (e.g. opening, warm up, review, anticipatory set, riddles, prediction activities)					
Middle: (e.g. Instruction, Checking for Understanding, Independent or pairs or group practice)					
Backup:					
End: e.g. Closing, Assessments, Extension of Lesson, H.W. Assignments)					
Comments: What was good? Needs improvement?					

Some of the take-aways:

1. working cooperatively
2. good coordination between friends
3. leading and supporting teaching
4. sharing of ideas
5. easy to handle classroom sometimes

6. new method/technique in teaching
7. to work together in group supporting each other
8. achieves different teaching strategies from the partners
9. using the materials quite effectively
10. learned to prepare lecture notes together

11. increases motivation for teachers
12. discussion before going to class
13. interesting class and students are more motivated
14. both people have equal responsibility to make an effective class

Findings / Discussion

Problems:

- Two weak student teachers paired together
- Insufficient planning time
- Lack of co-teaching ‘modeling’
- Transition from Lecture Method
- Lack of classroom space and resources
- Not implementable in public schools

M.Ed. Student Teachers' feedback

Overall the co-teaching was good. All the co-teachers were active in class while teaching. In some cases they were confuse and nervous to teach us as well. To improve the reading habit and students participation in classroom co-teaching should be done in future; It makes a class students-centred not a teacher-centred because in those types of class students are more active than teachers. In our class also students were active more in comparison to teachers. Some teachers were not good like our professional teachers but some were strong like our professional teachers. Co-teaching is really good in our Nepali context because in every school number of students in a class are around fifty so one teacher can't handled the big class. So, if there is two teachers in each class then students get chance to improve themselves and to be talent in their course. Thank you.

B.Ed. Students' responses

Co-teaching was very good because they combined their knowledge and they teach very effectively.

Co-teaching is not bad.

Co-teaching was helpful and very effective for me.

Co-teaching is benefitted for the students.

Co-teaching our classes with a co-teacher were more active than usual.

Co-Teaching, Kathmandu, M.R.C.

Research Questions

- What is the current status of professional development practices of English teachers in Nepal?
- What is their experience of the professional development practices?

Areas Research Instruments Cover

Innovation

Keeping teaching journal

Analyzing critical incidents

Analyzing cases

Assembling teaching portfolio

Experimenting new ideas

Doing action research

Reflecting upon own practice

Collaboration

Seeking to contribute to the work of others

Involving in teachers' support groups

Sharing responsibilities with colleagues

Solving classroom problems through

collaborative action research

Co-teaching and co-presentation based on

their joint preparation

Mentoring (Helping others learn)

"sage on the stage"

"guide on the side"

Giving model presentations

Getting mentees to expose their needs and problems

Peer coaching and counseling

Helping prepare lessons and instructional materials

Working as a critical friend

Supervising trainees or novice teachers for appropriate feedback

Occasional courses

Attending workshops and seminars along with the short term or long term teacher training programs

Attending the conferences of professional organizations like NELTA, TESOL, etc.

Taking courses at local university programs

Joining language training courses

Joining distance courses

Taking inter-disciplinary courses

Self study

Reading professional materials

Browsing internet

Reading special tips in magazines or
newspapers

Reading comments or feedback on bulletin
board

Reading daily diaries and portfolio collection
for reflection and self-evaluation

Teacher Development Practices in Nepal

SSRP (2009-2015)

- Policy Guidelines
 - Career Preparation
 - Qualification of Grading
 - Professional Development (one month TPD training course within five years period)
 - Teachers' Accountability (continuous assessment of teachers' performance)
 - School leadership

SSRP (2009-2015)

- Three modes of training
 - Training cum workshops – face to face mode – 5 days in training centers or TPD hubs
 - Self-study exercise in schools – 3 days
 - Instructional counseling – 2 days complete guidance of the same set of trainers

Classroom Practices

Recollecting ideas through apprenticeship of observation

Gaining experience through classroom teaching

Following the given guidelines in the textbooks

Observing colleagues at work

Taking new role at work

Applying the reflected outcomes in the classrooms

Decision Making

Determination of teachers' needs

Involvement of teachers while planning and decision making

Encouragement to teachers for contributing to form school policies

Decisions of choosing participants for the training programs

Sharing Ideas

Sharing teachers' beliefs about school goals

Sharing teachers' values and philosophy with teachers

Discussing new ideas with teachers

Sharing samples of students' works

Revising teachers' core values and beliefs

Workplace learning culture

Continuous learning and seeking new ideas

Constant stimulation of internal demands for change

Positive attitude towards the development of the schools

Teachers' up-to-date in the area of work

Colleagues treating as resources

Good practice of network among similar institutions

Forum providing for teachers to review their progress

Arrangement of visit to other schools

Placing teacher training and development in high priority

Opportunity and space

Ensuring trainings for all staff

Providing management trainings for teachers

Using talented teachers for leading INSET activities

Giving opportunities for colleagues to observe classes

Providing PD opportunities through external experts

Feedback and Support

Making appraisal of teachers every year
Giving resources and support to each
PD activities

Providing time for ongoing review and
feedback

Observing each colleague at work

Giving incentives for innovative works

Top down approach

One off

Current Status of PD Practices in Nepal

One -size -fits -all

Reflection

- Learnt about mentoring in Kathmandu University
- My school—no formal mentoring
- As a beginning teacher, I got no help from anyone until I asked
- Teacher groups/organizations have no help mechanism

Mentoring

Credit: www.gettyimages.com

Mentoring

Credit: www.gettyimages.com.lu

Mentoring: Nepali Scenario

- Teachers retiring: Every year experienced teachers being replaced by new teachers
- Challenge: No remarkably different performance by the new teachers
- Administration: ‘hire and fire’ strategy, no link between the outgoing and the incoming teachers
- No mechanism to support the new teachers

Mentoring: Nepali Scenario

- Designated Mentor-like support:
 - School supervisors
 - Resource Persons—

but their role has been largely administrative

My mini-research questions on mentoring

- How is the situation of mentoring in the Nepalese schools? Do my experience represent the reality?
- Can mentoring be one of the best tools to develop them professionally and personally in the Nepalese context?

Query

- Is there any formal mentoring practice in Nepal?
- Is mentoring an urgent need to the Nepalese English language teachers?
- How aware are the English language teachers about the mentoring mode of professional development?
- How far is the mentoring relevant in TPD in the context of ELT in Nepal?

Global scenario

- USA—Formal mentoring has been started since 1980s.
 - Mentoring the beginning teachers has been mandated by law in Texas since 1999.
- Australian writer Kay Martinez (2001) mentioned in his article “Mentoring new teachers: Promise and problems in times of teacher shortage” that the Australian government started adopting mentoring from the 1990s.
- Formal mentoring began in the UK from 1990s.

Rationale

- Nepal:
 - Very little research in TPD
- There is the issue of professional development among English language teachers
- Ministry of Education implements different teacher training packages but no transfer of training into the real classroom

Inquiry process

- 80 English language teachers from the Kathmandu valley
- 40 newly qualified teachers
- 15 teacher educators (University teachers)
- Questionnaire and interview as the tools of inquiry

Findings of my mini-research

- Different benefits can be derived from effective mentoring
- Formal mentoring is a common practice
- Relevancy of mentoring in every educational institution
- Mentoring helps for professional/personal development

What Next?

- Can we adopt mentoring in Nepal and check if this works?

NELTA

- English Access Microscholarship Program—U.S. Department of State Program
- 36 teachers (Equal gender balance)
- Co-teaching
- Multipronged mentoring/collaborative approach system

Any Lesson?

- It has a spillover effect
 - Train public school teachers
 - Share the ideas on different forums

What do the teachers say?

“I have learnt many new ideas of teaching English within this one year which I had not learnt during my ten years teaching experience. If there comes any problem, there are many helping hands in Access which has mentored me very well.”

[Quick Learning through mentoring]

–Dinesh Lamichhane, Access teacher, Nepal

What do the teachers say?

- *“I used to reject any offers given to me by any government agencies like District Education Office (DEO) to facilitate a teacher-training workshop because I was not confident enough but after being an Access instructor I welcome such opportunities.”*

[Confidence buildup]

-Rajendra Joshi, Access teacher, Nepal

What do the teachers say?

- *Even though there is no formal mentoring system in Access, I'm being mentored in one or other way round which is why I'm a planner, manager and performer today in Access class. No direct supervision and interfere here in Access. Different teacher trainings, conferences and online courses have enriched my teaching skills which I have been implementing in my regular classes as well.*

[Supervisor as my support]

- **-Keshari Rana, Access teacher**

Let's listen to what the teachers say?

- Mr. Radha Krishna Humagain, Access Teacher, Nepal
- Ms. Mandira Adhikari, Access Teacher, Nepal
- Small video about co-teaching
